Subject: Fwd: Last time Tom and Suri were photographed together

i think the 4th is a safe #.
Can you guys work out the total from there

Which number are we going with? Nicole had 44 and 46 on the covers... also, I want to correct it in the Tomkat text.

Seems dicey to guess at a date - this is something Tom's camp could prove we got absolutely wrong, if they so desired. While it's responsible to give Tom the benefit of the doubt with the LATER date, maybe it's safer to stick to when they were last photographed together during their last visit. Which would also be a bigger number.

If we go with the 4th, it's 44 days at press time

On Sep 17, 2012, at 5:20 PM, Jared Shapiro wrote:

They were DEFINITELY together on the 3rd. Katie didn't have her back then, we were on Katie sans Suri. We have Twitter sightings of Tom and Suri together late on the second. The 3rd we followed Katie sans Suri so can't be sure on that day. on the 4th as Katie was M.I.A. Most likely she came home on the 4th and Tom left. because On the 5th Tom was in London. So we need to go with the 4th or to be safe the 5th. But i think the 4th.

So Dylan/Mark - does that mean 51 days?

Michael is certain it's Aug. 1.

So 31 (days in Aug) plus 17 (days in Sept at press time) makes the total **48**

If my math is correct!
